EPA is committed to working closely with response agencies and state and local officials to ensure the safety of citizens, respond to concerns and to evaluate impact to water contaminated by the Gold King Mine Release. EPA is sharing information as quickly as possible with the public as experts work to evaluate any effects the spill may have on drinking water, public health, agriculture, fish and wildlife. Please see our website for the latest information: <http://www2.epa.gov/goldkingmine>
Regular updates will be posted as they are available.

Comments:

In regards to the Emergency Response to the Gold King Mine Release, I would like to request a brief moment of your time busy schedule to discuss the water treatment and recycling services that myself and partners provided. It is likely that we will be able to treat this contaminated water to a level able to be reintroduced to stream and/or discharged to the ground. The most vital piece of information required is either water analysis data or water samples as well as available info on the contaminants and what is expected for water after treatment in terms of its properties and values, pH, metal levels, etc. I am a lifetime Colorado resident and lived for a time in my life in Durango, CO. It is imperative to me and my family to see this situation have an outcome that will preserve our resources.

Thank you,

Joaquin Albert
